

# POLISH YOUR TEETH LIKE A DENTIST

## Introducing Bilistic Pro-Series Tooth Polisher For Dramatic At-Home Results

The **ONLY** beauty gift every woman wants, but does not have. Ask any woman you know right now, "Would you like to polish and gloss your teeth yourself?" The answer is almost certainly "YES!" Now ask her why does she doesn't have a professional teeth polisher apart of her weekly cosmetic and beauty routine? The overwhelming answer is "I don't know where or how to get one." **UNTIL NOW!**

Brighter Image Lab has spent the last two years developing a Professional Grade Tooth Polisher that has the same or even better performance as those used in dentist polishing. The director, Bill Watson, spoke out about the new polisher: "It's finally time a professional polisher is available to the woman who wants to enhance and manicure her image when she wants to, not just by appointment. Until now, professional polishers used by dentists were too expensive, and the polishers that were available just did not perform well enough to compete with the dentists' results. Every person deserves

the feeling of perfectly cleaned and polished teeth and a glossy smile. Now it's here," said Watson.

Brighter Image Lab is also introducing a New Teeth Cleaning Serum Called **Infusion** that is designed to clean, detoxify, whiten, brighten and polish teeth to the glossiest shine ever. The polisher uses the Infusion Serum to infuse the teeth's tubular pores, cleaning deep into the pulp of the tooth, while at the same time working to brighten, polish and gloss a shine on the tooth surface better than ever before.

Brighter Image Lab is an online dental lab open since 1997, specializing in lab direct smile makeovers with **NO DENTIST VISIT** One of the first to offer professional lab direct teeth whitening online, Brighter Image Lab produces custom fitted bleaching trays and Hi-Intensity Bleaching Gels. We were also the first to develop and design the removable dental veneers specifically online. The company is very proud of the new addition Bilistic Pro Series Teeth Polisher and Infusion Professional Teeth Cleaning Serum.
